# Academic Facilities Master Plan Program - State Plan

*For the Governor, the House Committee on  
Education, the Senate Committee on Education,  
and the Academic Facilities Oversight  
Committee*

October 1, 2012

## 2012 Report on Academic Facilities Master Plan Program – State Plan

*Preamble “...to ensure that adequate facilities and substantially equal facilities are, and will continue to be provided for Arkansas’ school children.”* ———— *Act 1181 of 2003*

Arkansas Code Annotated (A.C.A.) § 6-21-807 mandates that “the Division of Public School Academic Facilities and Transportation develop a comprehensive state Master Plan for managing state financial participation in local academic facilities projects across the state”.

A.C.A. § 6-21-112 further states that “a report on the state Academic Facilities Master Plan will be made to the Governor, the House Committee on Education, the Senate Committee on Education, and the Academic Facilities Oversight Committee by October 1 of each even numbered year”.

The state Master Plan documents the state’s role to provide guidance through manuals, rules, and funding programs to raise the level of the academic facilities in the state of Arkansas through repair and new construction programs in conformance with those manuals and rules. The compilation of the individual school district Master Plans, which must be approved by the state, details the state’s plan to achieve suitable and adequate facilities for all Arkansas school districts.

The academic facilities program includes two primary components of planning and funding programs.

### 1. **Planning**

- A. **The Academic Facilities Master Plan Program** is a program through which each school district develops and submits a Facility Master Plan for review and approval by the division. A Facility Master Plan is a six-year plan developed by a school district that contains current enrollment projections and details the school district’s strategy for maintaining, repairing, renovating, and improving through new construction or otherwise the school district’s academic facilities. The division is charged to analyze each local Master Plan and develop a statewide Master Plan which serves as a management tool for overseeing the state financial

participation of local academic facilities projects across the state. The statewide Master Plan includes the following:

- i. A list of committed projects for public school academic facilities for the upcoming fiscal year characterized by program and method of state financial participation and,
  - a. The committed projects and the estimated costs are compiled after review and approval by the division and submitted to the Commission for Arkansas Public School Academic Facilities and Transportation for approval.
- ii. the total estimated cost of each committed project and the estimated amount of state financial participation.
- iii. A four-year rolling forecast of planned new construction projects related to public school academic facilities.
  - a. The compilation of the four-year rolling forecast is derived from the individual school district's forecast detailing its anticipated needs.

B. **The Arkansas Public School Academic Facility Manual (*Facility Manual*)** was developed to provide uniform standards to guide the planning, design, and construction of new public school academic facilities and additions to existing public schools.

- i. Section 2, Chapter 7 of the Facility Manual outlines the construction standards for new construction and renovations. It is written to comply with the most current codes and construction procedures that are available at the time of the review and identifies which portions of the facility manual are considered standards and which portions may be considered guidelines.
- ii. Section 2, Chapter 5 of the Facility Manual outlines contains the Program of Requirements that defines the number, size, and type of spaces required in the construction of new Arkansas school facilities. It explains the rationale for the determination of spaces and clarifies which spaces are required under the Arkansas facility program and those spaces which are optional in school construction. An

explanation is also provided that explains standards and guidelines as they pertain to educational spaces.

## 2. **Funding**

Supplementing the aforementioned statutes is A.C.A. § 6-20-2501 – 6-20-2515 entitled “Arkansas Public School Academic Facility Funding Act”. These statutes provide the funding programs by which state financial assistance is rendered to school districts under the following academic facilities program.

### A. **Current Funding Programs**

- i. **Academic Facilities Partnership Program** - A.C.A. § 6-20-2507 is the principal funding program to support the long range goals and objectives of the school districts as defined in their Master Plan. State financial participation, based on a district’s Academic Facilities Wealth Index, is made available to a school district for eligible new construction projects as defined in A.C.A. §6-20-2502.
- ii. **Academic Facilities Catastrophic Program** - A.C.A. § 6-20-2508 is the state program to provide state financial participation for eligible catastrophic repair and construction projects. State funding supplements insurance or other public or private emergency assistance received by or payable to the school district to rebuild or repair the damaged facility to current state facility standards.
- iii. **High Growth School District Loan Program** - A.C.A. §6-20-2511 establishes the Academic Facilities High-Growth School District Loan Program. This statute establishes a program to provide an interest free loan to high-growth school districts in which the mills required to service the bonded indebtedness incurred for academic facilities exceeds the maximum expected millage for the high-growth school district.

### B. **Previous Funding Programs**

- i. **Academic Facilities Immediate Repair Program** was enacted to provide a one-time opportunity for school districts to correct the deficiencies that were noted during the assessment of 2004 and to provide immediate financial

assistance to school districts in advance of full implementation of the statewide planning process under the Academic Facilities Master Plan Program. This program provided school districts with state financial participation for eligible repair projects based on the Academic Facilities Wealth Index of the school district. The program was designed to address deficiencies in academic facilities that presented an immediate hazard to health or safety of students and staff, meeting minimum health and safety building standards or the extraordinary deterioration of the academic facility. Repairs typically completed under this program are now funded by the 9% of Foundation Funding that a school district must dedicate to maintenance, repair, and renovation activities.

- ii. **Transitional Academic Facilities Program** was enacted to provide state financial participation, based on a school district's Academic Facilities Wealth Index, in the form of reimbursement to a school district for eligible new construction projects for which debt was incurred or funds spent after January 1, 2005, and on and before June 30, 2006. Under this program a school district was allowed to proceed with new construction of an academic facility with the expenditure of local resources prior to the district's eligibility for state financial participation. New construction projects include any improvement to the academic facility and, if necessary, related areas such as the physical plant and grounds that bring the state of condition or efficiency of the academic facility to a state of condition or efficiency better than the facility's original condition. New construction also included additions and new facilities.

## Attachments

### Committed Projects

As mandated by A.C.A. § 6-21-807, attached is a list of committed projects for public school academic facilities for the upcoming fiscal year. The list indicates both the estimated state financial participation and estimated total project cost, and projects that have been completed.

Currently, the state has 280 Partnership Program projects committed with a total state financial participation amount of \$297,145,875.39. 995 Partnership Program projects have been completed with total state partnership of \$442,656,892.56. Including the Catastrophic, Transitional, and Immediate Repair programs, the state has completed or committed a total of 1,737 projects and provided \$856,983,439.04 of state financial participation as shown in the attached list of committed projects

### Four-Year Rolling Forecast

A.C.A. § 6-21-807 also mandates the four-year rolling forecast (see *attachment*) of planned new construction projects, related to academic facilities, as proposed by the school districts within their most recent Master Plan. This forecast represents the initial planning by the school districts. It will be refined as the process moves forward when applications are received for the Partnership Program and the Master Plan is updated each year.

## Summary

As of this date, all school districts have submitted Master Plans of committed and planned projects for division review. These Master Plans show districts involved in both immediate and long-range planning. School districts have also submitted requests for state financial participation in the various funding programs. School districts that do not submit Partnership Project applications are reviewed by the division on a case-by-case basis in accordance with A.C.A. § 6-21-811. Many districts not submitting Partnership Program project applications have district funds committed to earlier biennium Partnership Program construction projects and are completing those before requesting more state funds for additional projects.

Academic Facilities Master Plan Program - State Plan  
List of Committed Projects

District Name	School Name	Project Description	Program	Qualifying Cost	State Financial Participation	Status
Alma		Construct additional Classrooms	0607 Partnership	\$956,930.00	\$652,202.49	Completed
Alma		Construct additional Classrooms	0607 Partnership	\$1,527,949.00	\$692,264.00	Completed
Alma	School	Multi-use Facility/Safe Room	0911 Partnership	\$1,167,227.93	\$781,727.25	Completed
