

Program of Requirements

Introduction

A Program of Requirements (POR) is a compilation of the instructional and support spaces to be incorporated into a new or renovated school facility. The type, size and quantity of each space are included, resulting in a total gross square footage of the proposed building or renovation.

The POR establishes minimum adequate components, and total square footage required in a school construction project.

The following link may be accessed to download the POR. http://arkansasfacilities.arkansas.gov/public/userfiles/Program_of_Requirements/Revised_Copy_POR.xls

Program of Requirements

Before developing a POR, the School District must develop a thorough understanding of its educational mission, vision, and objectives to insure that the project meets current and future student instructional needs. After projected enrollment, grade configuration, and educational programs are established, the District works together with its Design Professional(s) to review and complete the interactive POR spreadsheet.
